

# PROJECT HOMELESS CONNECT ANCHORAGE

Project Homeless Connect (PHC) is a national model that originated in San Francisco in 2004. PHC has been implemented in over 200 cities across the United States.

The goal of PHC is to provide a one-stop shop that offers easy access to services to individuals and families who are homeless. This approach eliminates barriers and ensures the homeless receive services that have an immediate impact.

Services include medical, mental health, substance abuse, housing, dental, benefits, legal, free eyeglasses, ID, food, clothing, wheelchair repair and more.

**Come help us help the homeless!**
